Turning Innovation into Impact

Cell and gene therapies from Saxony to the world

More
info

Founded in 2023, the **SaxoCell e.V.** is the official association of the SaxoCell cell and gene therapy cluster, bringing together academic excellence, clinical expertise, and industrial innovation. As a dynamic platform for **international collaboration**, the association enables members to drive forward the development and application of **advanced therapies**. Through joint projects, networking, and strategic partnerships, SaxoCell e.V. empowers its members to shape the future of personalized medicine – from Saxony to the world.
